

# **National Cancer Patient Experience Programme**

## **2011/12 National Survey**

**York Teaching Hospital NHS Foundation Trust**

**Pre Publication August 2012**

The National Cancer Patient Experience Survey Programme is  
being undertaken by Quality Health on behalf of the Department of Health

## **Introduction**

The Cancer Patient Experience Survey 2011/12 (CPES) follows the successful implementation of the 2010 CPES, designed to monitor national progress on cancer care. The 2011/12 survey is congruent with the National Operating Framework (NOF) for the NHS 2012/13, which defines quality as those indicators of safety, effectiveness and patient experience that indicate that standards are being maintained or improved. The CPES thus provides information that can be used to drive local quality improvements, both by Trusts and Commissioners, and is consistent with the objectives of the NOF and the Outcomes Framework.

## **Participating Trusts**

160 acute hospital NHS Trusts providing cancer services took part in the survey. Primary Care Trusts, some of whom provide cancer services, were excluded from the survey, as were some specialist hospital Trusts because of very low patient numbers.

## **Patients selected to take part**

The survey included all adult patients (aged 16 and over) with a primary diagnosis of cancer who had been admitted to an NHS hospital as an inpatient or as a day case patient, and had been discharged between 1st September 2011 and 30th November 2011. The three month eligibility period for data capture purposes is identical to that for the 2010 CPES.

Patients eligible for the survey were taken from Trust patient administration systems; the inclusion criteria were that the patient had an International Classification of Disease (ICD10) code of C00-99 (excluding C44 and C84) or D05. As in the 2010 survey, the types of cancer patients included significant numbers with rarer cancers as well as patients in the “Big 4” cancer groups – i.e. breast, prostate, lung, and colorectal/Lower GI. The exclusion of patients with a cancer code of C84 (for example Mycosis Fungoides) was a new development for the 2012 survey; the number of patients so excluded nationally was very small.

Trust samples were checked rigorously for duplicates and patient lists were also deduplicated nationally to ensure that patients did not receive multiple copies of the questionnaire.

Trust samples were rigorously checked for deceased patients through the DBS system on at least three occasions during the fieldwork, to ensure that the numbers of deceased patients in samples was reduced to an absolute minimum. This process was undertaken by Quality Health and was highly effective.

## **Survey method**

Postal surveys were sent to patients' home addresses following their discharge. Up to two reminders were sent to non-responders. A freepost envelope was included for their replies. Patients could call a free telephone line to ask questions, complete the questionnaire verbally, or to access an interpreting service.

## **Response rate**

A total of 113,808 patients who had received treatment for cancer during September to November 2011 were included in the national sample for the Cancer Patient Experience Survey. These patients were allocated to 13 different cancer groups.

627 eligible patients from this Trust were sent a survey, and 434 questionnaires were returned completed. This represents a response rate of 74% once deceased patients and questionnaires returned undelivered had been accounted for. The national response rate was 68% (71,793 respondents). In 2010 the national response rate was 67%.

## **Percentage scores**

The questions in the cancer survey have been summarised as the percentage of patients who reported a positive experience. For example, "Percentage of patients who were given a complete explanation of their diagnostic tests" and "Percentage of patients who said that nurses did NOT talk in front of them as if they were not there". Neutral responses, such as "Don't know" and "I did not need an explanation" are not included in the denominator when computing the score.

The higher the score, the better the Trust's performance.

## **Low numbers of respondents and data not reported**

Some Trusts have relatively small numbers of cancer patients, so the total number of respondents to the survey may be low despite the high response rate. Reports for these Trusts have been completed in the normal way, but the results for these Trusts need to be treated with caution. It is important to recognise however, that the low numbers of respondents in these Trusts is simply the result of low numbers of cancer patients being treated.

Patients were asked to complete the questionnaire in respect of the Trust named on the covering letter. In those Trusts without a radiotherapy or chemotherapy unit, where patients reported receiving these treatments despite these instructions, responses have been suppressed.

In almost all Trusts, there were tumour groups where the number of respondents was less than 20; this is particularly true of tumour groups representing rarer cancers. Where numbers of respondents in a particular tumour group is less than 20, we have used the convention of leaving the relevant cell blank. This is further explained in the introduction to the tumour group tables in this report.

## Benchmark charts

Percentage scores are displayed on benchmark bar charts in the following section. Each bar represents the range of results across all Trusts that took part in the survey for one question. The bar is divided into:

- a red section: scores for the lowest-scoring 20% of Trusts in 2011/12
- a green section: scores for the highest-scoring 20% of Trusts in 2011/12
- an amber section: scores for the remaining 60% of Trusts in 2011/12

The black circle represents the score for this Trust. For example, if the circle is in the green section of the bar, it means that the Trust is among the top 20% of Trusts in England for that question. The line on either side of the circle shows the 95% confidence interval (the amount of uncertainty surrounding the Trust's score).

The table below each benchmarking chart shows the following: in column one, the Trust score for each question in 2010; in the second column, the Trust score for that question in 2011/12 (if this score is highlighted it means that the score is statistically significantly different from the score for 2010, with a blue highlight showing a higher value than in 2010, and a red highlight showing a lower score in 2012 than in 2010); column three represents the lower confidence interval at 95%; column four represents the upper confidence interval at 95% (the scores in columns three and four are the outer limits of the horizontal black line on the RAG chart). The fifth and sixth columns represent the upper threshold for the lowest scoring 20% of Trusts on that question and the lower threshold for the highest scoring 20% of Trusts on that question (i.e. the end of the red section and the beginning of the green section on the chart). The seventh column displays the highest Trust's score for this question in 2011/12 and the eighth column displays the number of respondents who gave this answer for this question. The ninth column displays a '+' alongside any question where the Trust's score falls within the lowest 20% of Trust scores for that question in 2011/12.

Where no Trust data or confidence interval is displayed on the RAG chart or in the tables for a particular question, there is insufficient data (below 20 respondents) to allow display.

## Further information

Full details of the survey method are in the National Report of the Cancer Patient Experience Survey 2011/12, which will be available at [www.quality-health.co.uk](http://www.quality-health.co.uk) from 17th August 2012; further details of survey development, nationally agreed methodology, and cognitive testing are also available at [www.quality-health.co.uk](http://www.quality-health.co.uk).

## Who responded to the survey at this Trust?

434 patients responded to the survey from the Trust. The tables below show the numbers of patients from each tumour group and the age and sex distribution of these patients.

### Respondents by tumour group

Tumour Group	Number of respondents*
Breast	73
Colorectal / Lower Gastrointestinal	69
Lung	12
Prostate	41
Brain/Central Nervous System	1
Gynaecological	18
Haematological	75
Head and Neck	16
Sarcoma	29
Skin	4
Upper Gastrointestinal	20
Urological	66
Other	10

\* These figures will not match the numerator for all questions in the 'comparisons by tumour group' section of this report because not all questions were answered by all responders.

### Age and sex

The survey asked respondents to give their year of birth. This information has been amalgamated into 6 age bands. 16 people did not provide their gender or age. Of the 418 who did, the age and gender distribution for the Trust was as follows:

	16-25	26-35	36-50	51-65	66-75	75+	Missing	Total
Men	0	1	6	59	59	61	9	195
Women	0	2	29	58	70	58	6	223
Total	0	3	35	117	129	119	15	418

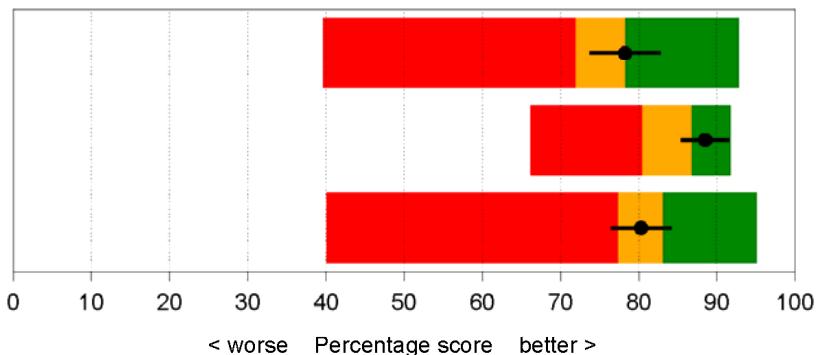

## Trust results

### Seeing your GP

Q01 Saw GP once/twice before being told had to go to hospital

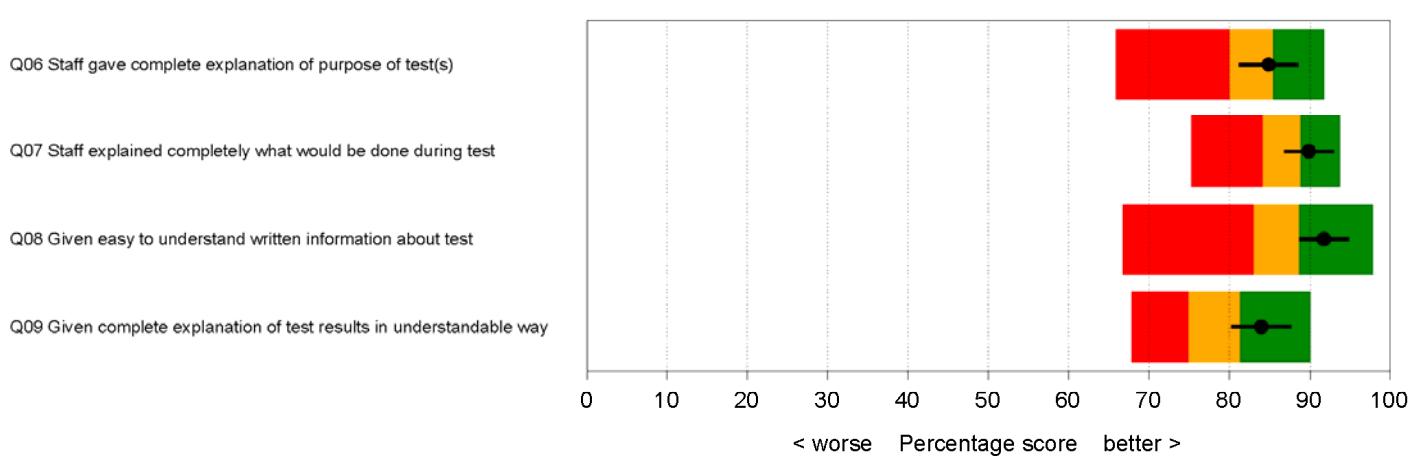

Q02 Patient thought they were seen as soon as necessary

Q04 Patient's health got better or remained about the same while waiting

Question		Threshold for highest scoring 20% of all Trusts	Threshold for lowest scoring 20% of all Trusts	Upper 95% confidence interval	Lower 95% confidence interval	2012 Percentage for this Trust	2010 Percentage for this Trust	Scored % in lowest 20% of Trusts 2012	Number of responders for this Trust
Q1	Saw GP once/twice before being told had to go to hospital	78%	72%	83%	72%	78%	80%	93%	322
Q2	Patient thought they were seen as soon as necessary	87%	80%	92%	85%	88%	85%	92%	417
Q4	Patient's health got better or remained about the same while waiting	83%	77%	84%	76%	80%	84%	95%	416

## Diagnostic tests

Q14	86%	73%	64%	73%	76%

## Deciding the best treatment for you

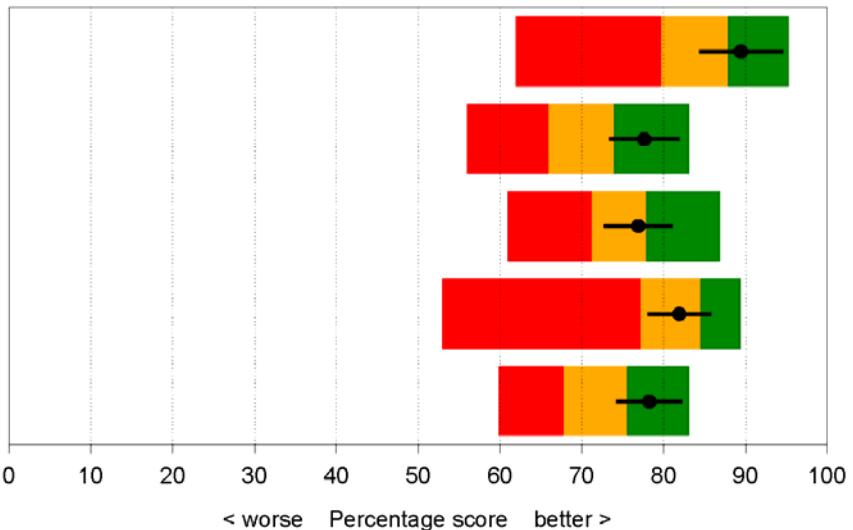

Q15 Patient given a choice of different types of treatment

Q16 Patient's views definitely taken into account by doctors and nurses discussing treatment

Q17 Possible side effects explained in an understandable way

Q18 Patient given written information about side effects

Q19 Patient definitely involved in decisions about care and treatment

Question		2010 Percentage for this Trust	2012 Percentage for this Trust	Lower 95% confidence interval	Upper 95% confidence interval	Threshold for lowest scoring 20% of all Trusts	Threshold for highest scoring 20% of all Trusts	Highest Trust's percentage score	Number of responders for this Trust	Scored % in lowest 20% of Trusts 2012
Q15	Patient given a choice of different types of treatment	88%	89%	84%	94%	80%	88%	95%	142	
Q16	Patient's views definitely taken into account by doctors and nurses discussing treatment	-	78%	73%	82%	66%	74%	83%	367	
Q17	Possible side effects explained in an understandable way	74%	77%	73%	81%	71%	78%	87%	390	
Q18	Patient given written information about side effects	80%	82%	78%	86%	77%	84%	89%	387	
Q19	Patient definitely involved in decisions about care and treatment	76%	78%	74%	82%	68%	76%	83%	405	

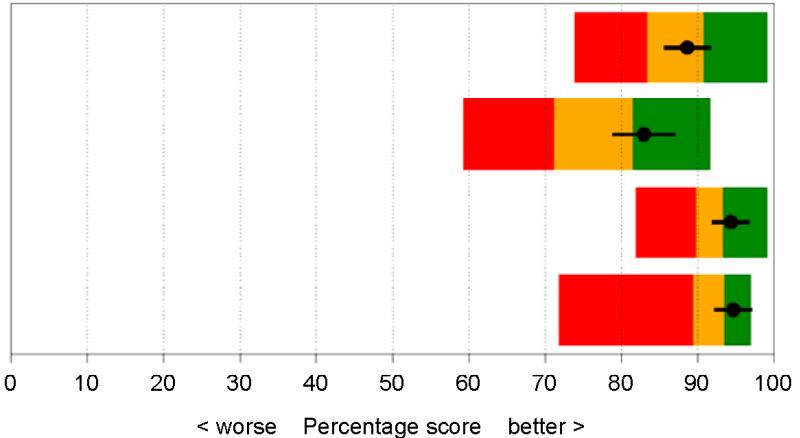

## Clinical Nurse Specialist

Q20 Patient given the name of the CNS in charge of their care

Q21 Patient finds it easy to contact their CNS

Q22 CNS definitely listened carefully the last time spoken to

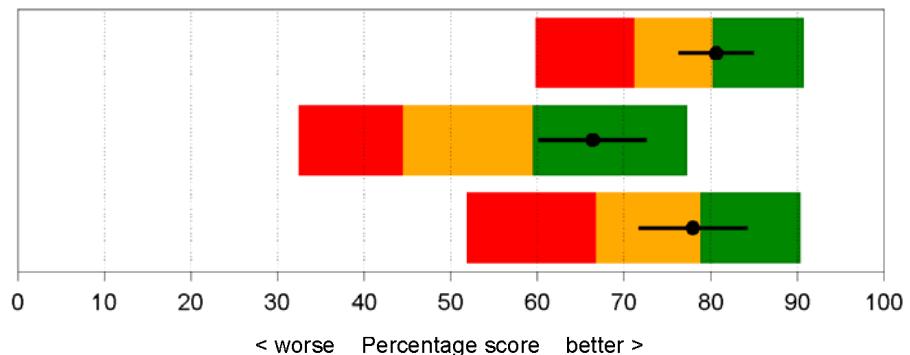

Q23 Get understandable answers to important questions all/most of the time

Question							Scored % in lowest 20% of Trusts 2012	Number of responders for this Trust	
							Highest Trust's percentage score	Threshold for highest scoring 20% of all Trusts	
							Upper 95% confidence interval	Lower 95% confidence interval	
Q20	Patient given the name of the CNS in charge of their care	84%	89%	86%	92%	83%	91%	99%	412
Q21	Patient finds it easy to contact their CNS	82%	83%	79%	87%	71%	81%	92%	334
Q22	CNS definitely listened carefully the last time spoken to	93%	94%	92%	97%	90%	93%	99%	353
Q23	Get understandable answers to important questions all/most of the time	93%	95%	92%	97%	89%	94%	97%	317

## Support for people with cancer

Q24 Hospital staff gave information about support groups

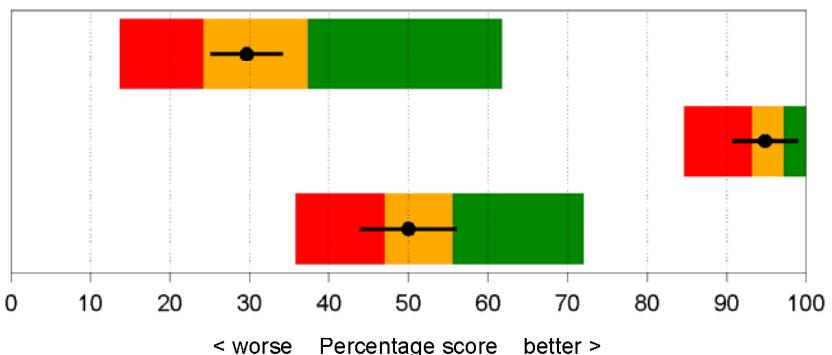

Q25 Hospital staff gave information on getting financial help

Q26 Hospital staff told patient they could get free prescriptions

Question								
Q24	Hospital staff gave information about support groups	78%	81%	76%	85%	71%	80%	91%
Q25	Hospital staff gave information on getting financial help	50%	66%	60%	73%	44%	59%	77%
Q26	Hospital staff told patient they could get free prescriptions	68%	78%	72%	84%	67%	79%	90%
	2012 Percentage for this Trust							
	2010 Percentage for this Trust							

## Cancer research

Q27 Taking part in cancer research discussed with patient

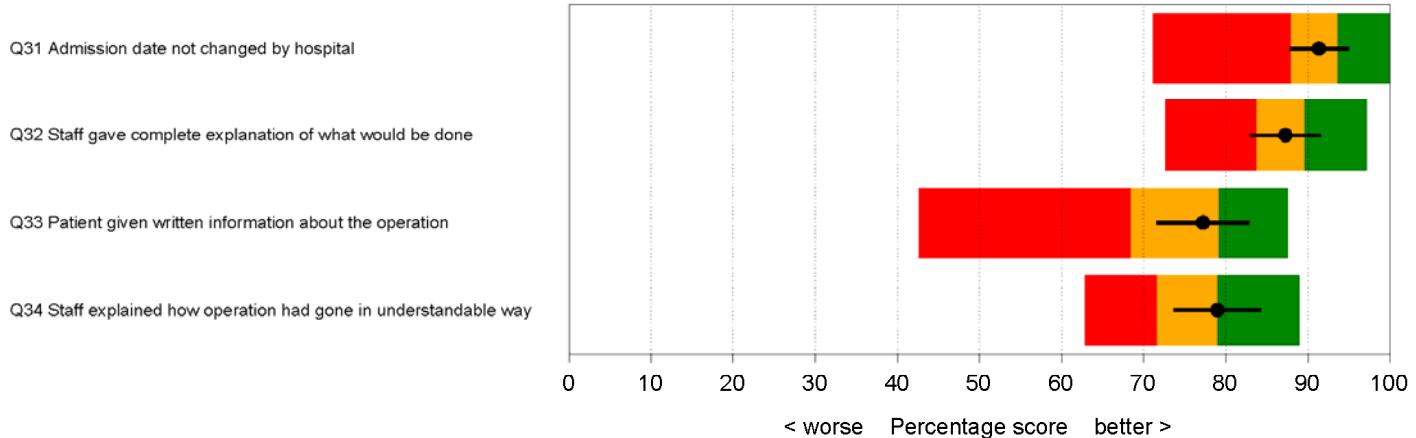

Q28 Patient glad to have been asked about taking part in cancer research

Q29 Patient would like to have been asked about taking part in cancer research

Question							Scored % in lowest 20% of Trusts 2012	
							Number of responders for this Trust	
Q27	Taking part in cancer research discussed with patient	-	30%	25%	34%	24%	37%	62% 398
Q28	Patient glad to have been asked about taking part in cancer research	-	95%	91%	99%	93%	97%	100% 116
Q29	Patient would like to have been asked about taking part in cancer research	-	50%	44%	56%	47%	56%	72% 266

## Operations

Question	Scored % in lowest 20% of Trusts 2012	Number of responders for this Trust	Highest Trust's percentage score	Threshold for highest scoring 20% of all Trusts	Threshold for lowest scoring 20% of all Trusts	Upper 95% confidence interval	Lower 95% confidence interval	2012 Percentage for this Trust	2010 Percentage for this Trust	
Q31								94%	100%	92%
Q32								90%	97%	90%
Q33								79%	88%	78%
Q34								79%	89%	77%

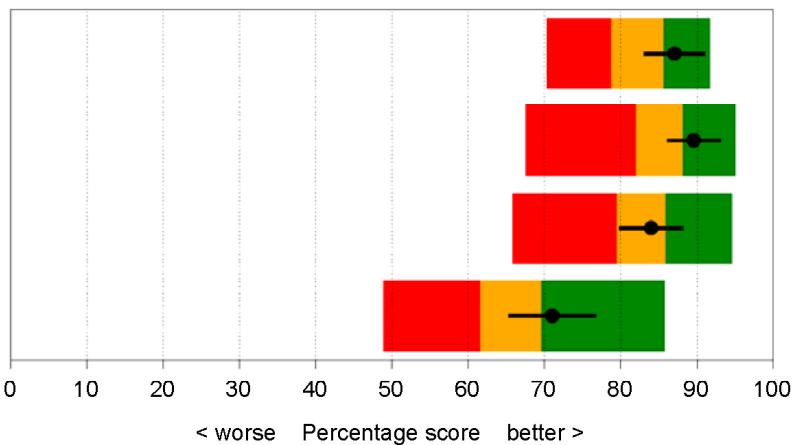

## Hospital doctors

Q36 Got understandable answers to important questions all/most of the time

Q37 Patient had confidence and trust in all doctors treating them

Q38 Doctors did not talk in front of patient as if they were not there

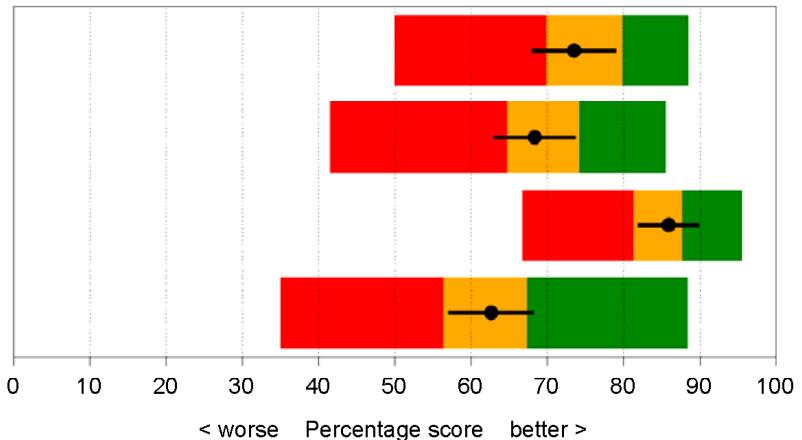

Q39 Patient's family definitely had opportunity to talk to doctor

Question	Scored % in lowest 20% of Trusts 2012	Number of responders for this Trust	Highest Trust's percentage score	Threshold for highest scoring 20% of all Trusts	Threshold for lowest scoring 20% of all Trusts	Upper 95% confidence interval	Lower 95% confidence interval	2012 Percentage for this Trust	2010 Percentage for this Trust
Q36			92%	91%	79%	86%	79%	87%	85%
Q37			95%	93%	82%	88%	82%	90%	88%
Q38			95%	88%	80%	86%	80%	84%	88%
Q39			86%	77%	62%	70%	62%	71%	73%

## Ward nurses

Q40 Got understandable answers to important questions all/most of the time

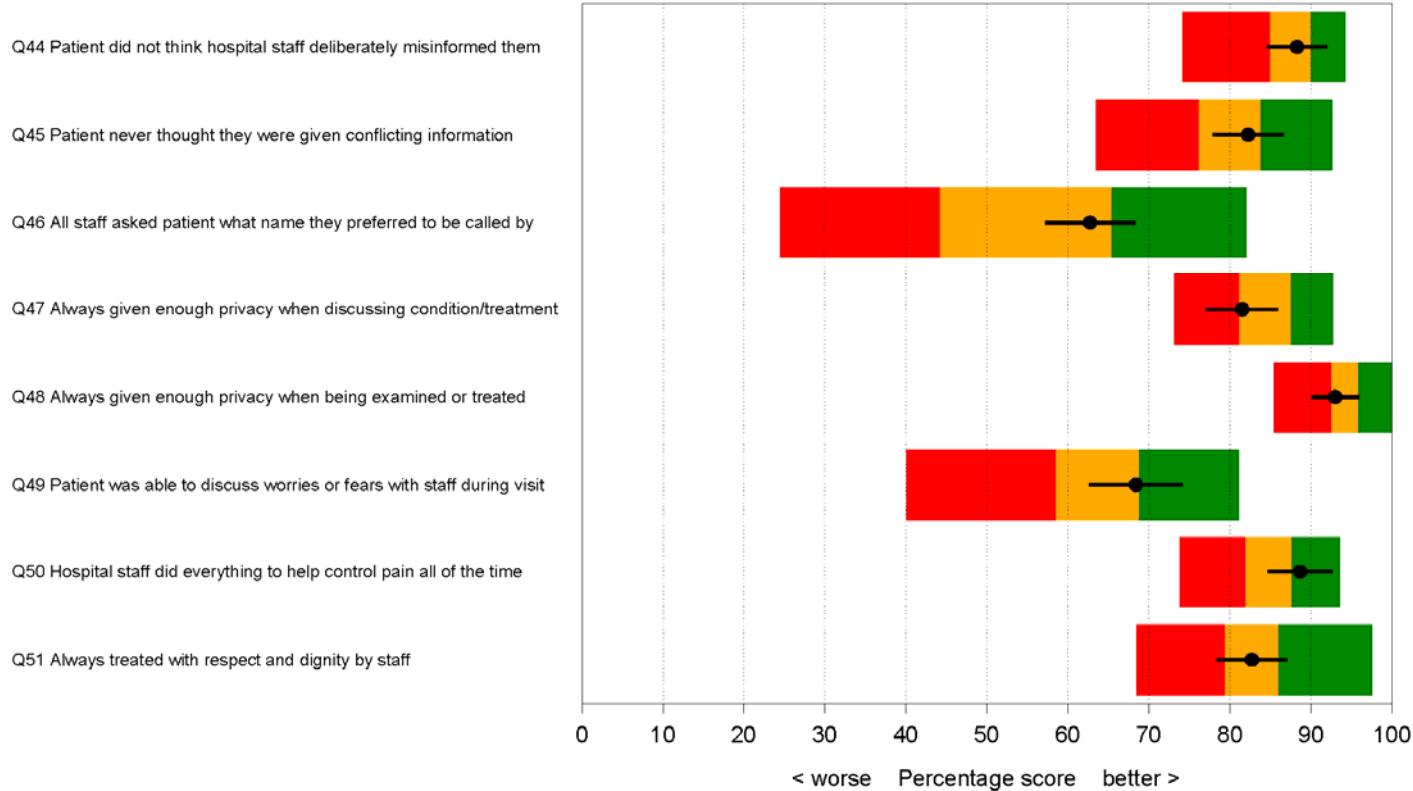

Q41 Patient had confidence and trust in all ward nurses

Q42 Nurses did not talk in front of patient as if they were not there

Q43 Always / nearly always enough nurses on duty

Question									
Q40	Got understandable answers to important questions all/most of the time	75%	73%	68%	79%	70%	80%	88%	249
Q41	Patient had confidence and trust in all ward nurses	68%	68%	63%	74%	65%	74%	85%	297
Q42	Nurses did not talk in front of patient as if they were not there	86%	86%	82%	90%	81%	88%	95%	298
Q43	Always / nearly always enough nurses on duty	71%	63%	57%	68%	56%	67%	88%	297

## Hospital care and treatment

Question	Scored % in lowest 20% of Trusts 2012	Number of responders for this Trust	Highest Trust's percentage score	Threshold for highest scoring 20% of all Trusts	Upper 95% confidence interval	Lower 95% confidence interval	2012 Percentage for this Trust	2010 Percentage for this Trust
Q44 Patient did not think hospital staff deliberately misinformed them			94%	90%	85%	92%	88%	89%
Q45 Patient never thought they were given conflicting information			93%	84%	76%	87%	82%	82%
Q46 All staff asked patient what name they preferred to be called by			82%	65%	44%	68%	57%	-
Q47 Always given enough privacy when discussing condition/treatment			93%	87%	81%	86%	77%	81%
Q48 Always given enough privacy when being examined or treated			100%	96%	93%	96%	90%	94%
Q49 Patient was able to discuss worries or fears with staff during visit			93%	84%	76%	87%	78%	-
Q50 Hospital staff did everything to help control pain all of the time			246	93%	88%	93%	82%	82%
Q51 Always treated with respect and dignity by staff			256	81%	69%	74%	59%	-

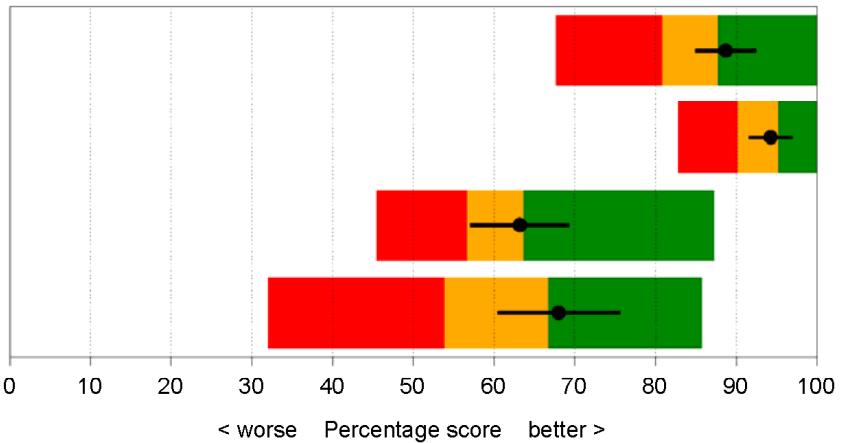

## Information given to you before leaving hospital and home support

Q52 Given clear written information about what should / should not do post discharge

Q53 Staff told patient who to contact if worried post discharge

Q54 Family definitely given all information needed to help care at home

Q55 Patient definitely given enough care from health or social services

Question	Scored % in lowest 20% of Trusts 2012	Number of responders for this Trust	Highest Trust's percentage score	Threshold for highest scoring 20% of all Trusts	Threshold for lowest scoring 20% of all Trusts	Upper 95% confidence interval	Lower 95% confidence interval	2012 Percentage for this Trust	2010 Percentage for this Trust
Q52								89%	89%
Q53								96%	94%
Q54								64%	63%
Q55								62%	68%

## Hospital care as a day patient / outpatient

Q56 Staff definitely did everything to control side effects of radiotherapy

Q57 Staff definitely did everything to control side effects of chemotherapy

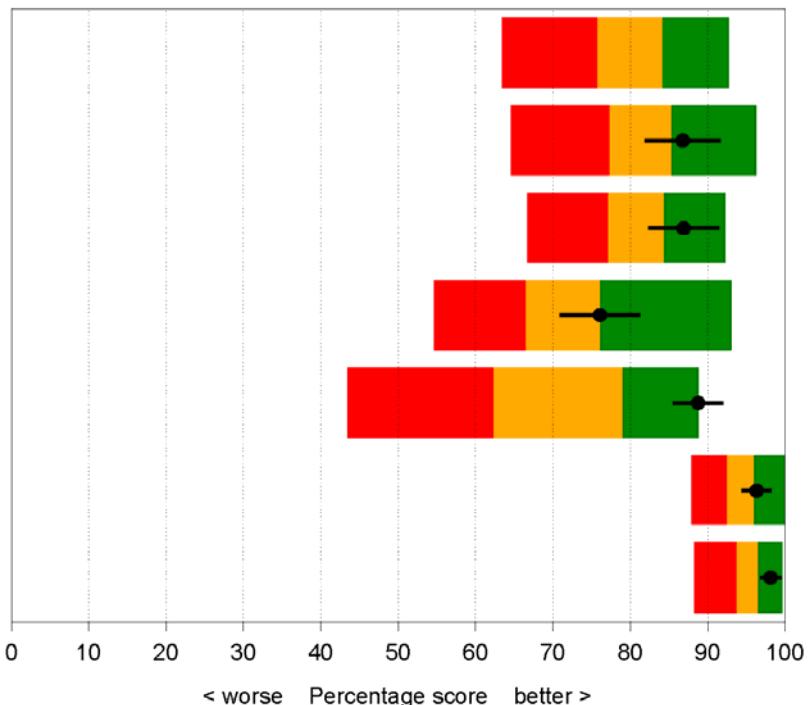

Q58 Staff definitely did everything they could to help control pain

Q59 Hospital staff definitely gave patient enough emotional support

Q61 Waited no longer than 30 minutes for OPD appointment to start

Q62 Patient thought doctor spent about the right amount of time with them

Q63 Doctor had the right notes and other documentation with them

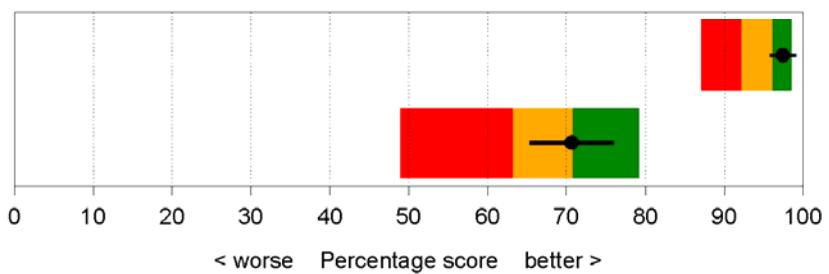

Question		2012 Percentage for this Trust	2010 Percentage for this Trust	Lower 95% confidence interval	Upper 95% confidence interval	Threshold for lowest scoring 20% of all Trusts	Highest Trust's percentage score	Number of respondents for this Trust	Scored % in lowest 20% of Trusts 2012
Q56	Staff definitely did everything to control side effects of radiotherapy					76%	84%	93%	
Q57	Staff definitely did everything to control side effects of chemotherapy	90%*	87%	82%	92%	77%	85%	189	
Q58	Staff definitely did everything they could to help control pain	82%	87%	82%	91%	77%	84%	213	
Q59	Hospital staff definitely gave patient enough emotional support	73%	76%	71%	81%	66%	76%	263	
Q61	Waited no longer than 30 minutes for OPD appointment to start	87%	89%	86%	92%	62%	79%	365	
Q62	Patient thought doctor spent about the right amount of time with them	94%	96%	94%	98%	92%	96%	377	
Q63	Doctor had the right notes and other documentation with them	98%	98%	97%	99%	94%	96%	372	

\* The wording of questions 56 and 57 was changed in this year's survey and while the questions are not strictly comparable last year's data has been left in for information.

## Care from your general practice

Q64 GP given enough information about patient's condition and treatment

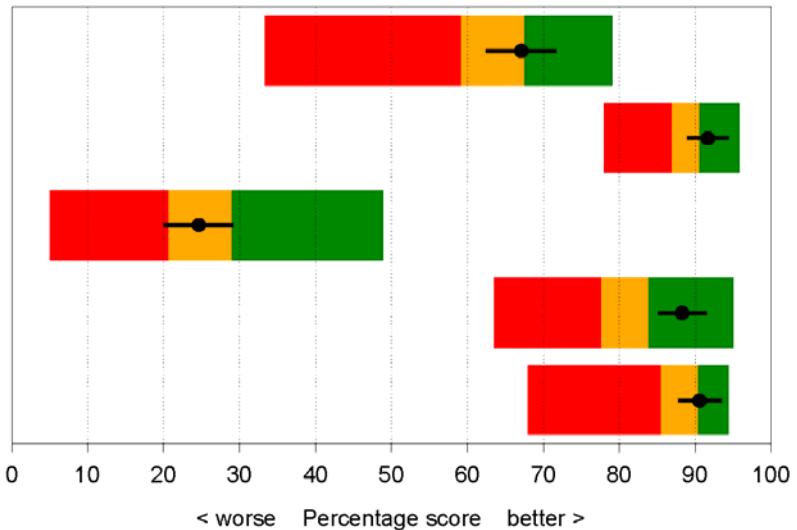

Q65 Practice staff definitely did everything they could to support patient

Question								Scored % in lowest 20% of Trusts 2012
								Number of responders for this Trust
Q64	GP given enough information about patient's condition and treatment	97%	97%	96%	99%	92%	96%	99%
Q65	Practice staff definitely did everything they could to support patient	73%	71%	65%	76%	63%	71%	79%
	2010 Percentage for this Trust

The National Cancer Patient Experience Survey was undertaken by Quality Health, which specialises in measuring patients' experiences of hospital, primary care and mental health services, using this information to improve the quality of health care and the responsiveness of health services to patients and service users' needs.

Quality Health works with all acute hospitals in England, all independent providers of hospital care, and all Health Boards in Scotland using rigorous survey methods to evaluate the quality of services to patients, the outcomes of operative procedures and health gain, and establish the views of NHS staff. Quality Health also works for healthcare system providers in Wales and Northern Ireland.

Quality Health is an approved contractor for the Care Quality Commission survey programmes of patients and staff in the NHS and also undertakes data collection and survey systems for the National Patient Reported Outcomes programme on behalf of the Department of Health. Quality Health has headquarters in North Derbyshire.

Further information on the National Cancer Patient Experience Survey programme and the 2011-12 survey can be obtained at [www.quality-health.co.uk](http://www.quality-health.co.uk)
