The new interactive Inpatient Falls Training Package is now live on the learning hub

- Is your patient at risk of falls?
- Do you understand how to assess their risk?
- Are you aware of the Trust’s falls interventions?
- Do you know what to do following a patient fall?

Complete the Inpatient Falls E-learning Package

The aim of the module is to raise awareness around patient falls, the importance of risk assessment and the mitigation of identified risk.

Falls and fall related injuries are common and a serious problem for patients in hospital, particularly older people. Evidence shows that the incidence of falls can be reduced through assessment and targeted interventions that will minimise harm to patients at risk of falling.

The training can be accessed by following this link and clicking the learning hub button; https://learninghub.yorkhospitals.nhs.uk/enrol/index.php?id=1844
