For Scarborough, Whitby, Ryedale:
Children's Therapy Department
Springhill House
19 Springhill Close, Scarborough
North Yorkshire, YO12 4AD
Telephone: 01723 342357

Caring with pride
Your child has been referred to the Children’s Therapy Team. The therapy team consists of:

- **Physiotherapists**
- **Speech & Language Therapists**
- **Occupational Therapists**

This leaflet explains how we work with you and your child, and what you can expect from our service.

**What do Physiotherapists do?**

The Physiotherapist supports the development of your child’s movement such as rolling, sitting, and walking. They will advise you on how to handle and position your child. Your baby will usually be seen by a Physiotherapist by 6 months of age.

**What do Speech and Language Therapists do?**

The Speech & Language Therapist supports with feeding difficulties and communication skills. Our therapists are knowledgeable on beneficial approaches used with children with Down Syndrome, for example, Makaton signing and See & Learn.
What do Occupational Therapists do?
The Occupational Therapist supports your child with participation in age appropriate activities and the provision of equipment to facilitate this. This can include seating and bathing aids. They will also support your child’s fine motor (i.e. hand and finger) development. Your baby will usually be seen between 6 months and 2 years of age as needs arise.

Where will you see us?
We may see your child at a clinic or hospital, at home or in your child’s early years setting.

What can you expect from us?
In therapy services we recognise that every child is different. We will work with you and your family to find out what issues are important to you. We will give you strategies and advice that you can implement in your daily life. We believe that empowering you to support your child in their daily life will lead to the best outcomes for your child.
How often will I be seen?
The therapist will discuss with you how often your child needs to be seen. You may be offered some joint appointments with Physiotherapy / Occupational Therapy / Speech & Language Therapy. This reduces the number of appointments you need to attend. It helps us to see your child’s overall development, and what is most important to you at that time. This can be offered:
- between 6 and 12 months
- between 2 and 3 years
- between 3 and 6 years

When will I be discharged from therapy?
The therapy services don’t necessarily stay involved with your child continuously because of their diagnosis of Down Syndrome. We may work with your child for a period of time, and then discharge them once we think the right strategies are in place to support them at that time. Your child can be re-referred to us at any stage for another ‘episode of care’.
Are there any other useful services I can access?

You may also receive support from the following services:

- Portage
- York Down Syndrome Support Group
- Early Support.

We work closely with these services if they are local. Please ask us if you would like any further information about them.
Space for your notes
Tell us what you think of this leaflet

We hope that you found this leaflet helpful. If you would like to tell us what you think, please contact your local service, our contact information is on the front page of this leaflet.

Teaching, training and research

Our Trust is committed to teaching, training and research to support the development of health and healthcare in our community. Healthcare students may observe consultations for this purpose. You can opt out if you do not want students to observe. We may also ask you if you would like to be involved in our research.

Patient Advice and Liaison Service (PALS)

PALS offers impartial advice and assistance to patients, their relatives, friends and carers. We can listen to feedback (positive or negative), answer questions and help resolve any concerns about Trust services.

PALS can be contacted on 01904 726262, or email pals@york.nhs.uk.

An answer phone is available out of hours.
