I don’t like the title ‘Cancer End of Treatment Summary’, there isn’t always an end.

We changed the title to ‘Cancer Treatment Summary’ – This means that it can be given out at the end of any phase of treatment.

It could include potential side effects as many people are not aware of what these might be.

We included late effects of treatment and alert symptoms on the Treatment Summary Template.

All of the information included should be cancer specific.

We have gathered information from each Cancer Nurse Specialist team to create separate templates specific to each tumour site.
